What to expect...

The **Infection Prevention and Control** course equips learners with the knowledge and confidence to follow key infection control principles in the workplace.

Delegates will learn how to protect themselves, colleagues, and those they support by implementing effective infection prevention measures. The course also builds understanding of organisational policies and procedures, ensuring learners can safely and effectively limit the risk of infection and prevent its spread.

This training also supports mandatory induction and refresher requirements for infection prevention and control, as required by **Skills for Care** and the **CQC**.

Learners will receive a **Connect2Care Certificate of Attendance** upon completion.

Course content:

1	Understand the different types of pathogens and how they spread
2	Legislation, policies and procedures relating to infection prevention
3	Roles and responsibilities in infection control
4	Using risk assessments effectively
5	How to keep yourself and others safe from the risk of infection
6	How to communicate confidently about infection control measures
7	Recognising the chain of infection and how to break it
8	Practical workplace measures to prevent the spread of infection
9	Safe use of products and methods for infection limitation and control
